- b) Department of Fire and Emergency Services/City of Busselton
- c) Department of Parks and Wildlife

8. MATTERS OF URGENCY**9. OCCUPATIONAL HEALTH & SAFETY (OH&S)****10. NEXT MEETING**

The next meeting will be held on 13 JUNE 2017 at 7:30pm TBC location.

11. CLOSURE

Attachment 1

Attachment 7.1 Report to the City of Busselton Bush Fire Advisory Committee (BFAC) meeting to be held on 14 March 2017

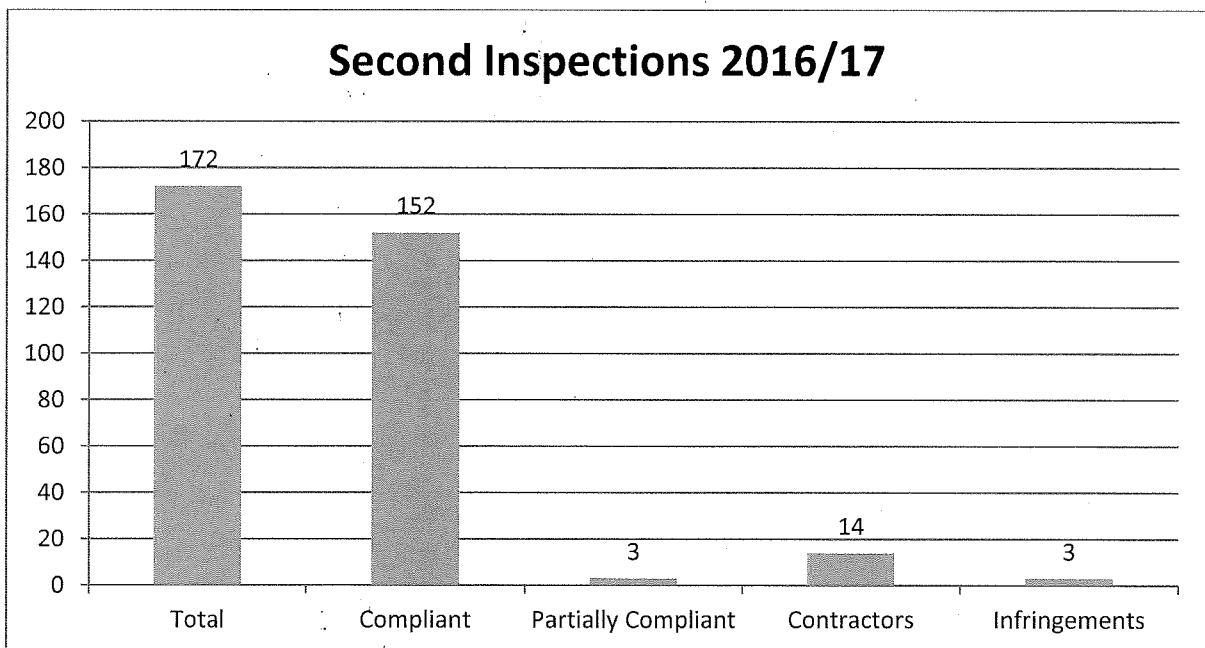

Agency: City of Busselton

Officer Representing: Ranger & Emergency Services Coordinator, Ian McDowell

Matters to be discussed:

1. Annual Fire Inspections

The focus of the annual fire break inspection program has been properties in high bushfire prone areas. The following is a graphical representation of the inspections as at 4 March 2017.

2. Yallingup Parking Review – Emergency Services Vehicle Access

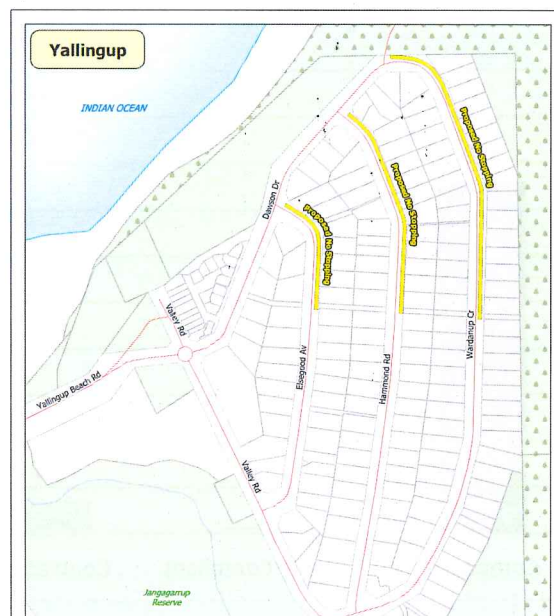

In March 2016 the City received a letter from DFES expressing concerns regarding on street parking in the Yallingup townsite. The letter, which was co-signed by representatives of other emergency services (WAPOL, St John Ambulance, and the Yallingup Coastal Bush Fire Brigade) expressed concerns that current on street parking arrangements may obstruct access for emergency services vehicles during an emergency incident.

The City developed some proposed parking controls, no stopping on the western sides of Elsegood Avenue, Hammond Road, and Wardanup Crescent for public consultation. The results of the consultation were inconclusive however, following the consultation process concerns were raised that parking controls along the entire lengths of the three streets were not warranted, and that it is mainly the northern end of the streets that are congested during peak periods.

The City has since consulted with DFES, the Bush Fire Brigade, WAPOL, and the residents association to determine a solution for the problem. As a result of this consultation it is proposed that no parking controls (a yellow line) be installed along the western sides of Elsegood Avenue, Hammond Road, and Wardanup Crescent from Dawson Drive to the Public Access Way.

The proposed parking controls are subject to the approval of Council.

Attachment 2**Attachment 7.2 Report to the City of Busselton Bush Fire Advisory Committee (BFAC) meeting to be held on 14 March 2017**

Agency: City of Busselton / DFES

Officer Representing: Peter Stark, Acting Community Emergency Service Manger (CESM)

Matters to Report:

1) eAcademy

- Improvements have continued to be made on the eAcademy and volunteer portal, including those who have multiple registrations being able to select which supervisor they wish to forward their pathway or course request to. Note that the default supervisor is DO Capes and he has received so many requests, he has been forced to reject them to encourage crew members to use the drop down list to find the more suitable supervisor.
- Before you enter the DFES eAcademy, please check a number of enhancements have occurred or are occurring that you need to know about. Many members are not doing this and subsequent enquiries to brigade training officers, CESM's and Regional Training Coordinators is diverting them from tasks which would be more beneficial to volunteers.
- Note that users of Hotmail, msn.com or live.com email accounts will NOT receive any eAcademy email confirmations via these services and MUST check their Inbox within eAcademy for any pathway or course registration confirmations.

2) Training

- The City training calendar has been entered into eAcademy and all members can now access all local courses that have been finalised. A previous restriction that only displayed courses 6 weeks before it was scheduled, has been removed. i.e. Members can now enrol for any local course throughout the year.
- Development of a Training Themes Calendar is in progress, which will provide Brigade training officers with an annual guide and resources to assist them in running timely and relevant training within their brigades. When complete, it will be distributed to all Brigades along with some relevant training resources and exercises on a thumb drive.

3) New Appliance Deliveries

- In recent weeks we have taken delivery of a new 3.4U for Sussex brigade and a new LT for Dunsborough brigade.
- Sussex 3.4U had an abnormally large number of defects ranging from minimal to significant and as a result, it was returned to Frontline Fire on 1st March for remedial work. Sussex continue to use their 2.4 in the interim.
- Dunsborough's LT was to replace their old LT and is in full service, albeit with an incorrect selcall number, for which a ticket has been lodged for correction.

4) Security alarms at fire stations

- Yoongarillup station was broken into again around 25th February with damage to an external and internal gyprock wall, and a number of smaller items stolen.
- The quotation process for monitored alarm systems is complete and installation at the initial 7 stations will commence with 14 days. Another 5 stations are due to receive alarm installations in the new financial year.
- Brigades receiving alarms systems in the first round will be contacted shortly.

5) Out of District Fires.

- Local brigade members continue to support other districts with crews of various appliances assisting at the Gwindinup and Rosa Brook fires.
- A request for debrief comments was made but none received.

6) Busselton 12.2 Shed

- The shed is now complete and now housing the 12.2. Part of the construction also included extension to the compacted gravel parking area to accommodate more vehicles. Thanks to support from local businesses and 12.2 volunteers, a concrete apron and ramp were also added.
- An informal opening is being planned for local brigade members and suppliers who made Donations to its construction.

7) Mental Health

- The volunteer portal now has a specific Mental Health First Aid page which provides details on the new Mental Health First Aid course. This course will be progressively rolled out to DFES staff and volunteers. Most brigades would benefit from having at least one MHFA trained member and ICV crew are aiming to have at least one available per shift.
- The DFES Wellness Branch and Workers Compensation & Injuries Branch are visiting the area this Friday evening to increase awareness and understanding of stress, mental health and support services available to volunteers AND their families.

8) Meelup Mallee

- This region hosts a critically rare plant – the 6500 year Meelup mallee. As part of a recent management plan revision, the management committee have released its location and fire management plan to fire services in an attempt to prevent the mallee from extinction during a fire event in the Meelup area. A short presentation will be made to highlights its location and fire management plan to FCO's.

9) Steiner School Visit

- Following up on FCO Peter Dawson's request regarding a fire management plan for the Carburnup Steiner School, we can report the following:
- The activity at the Carburnup hall is in fact a playgroup two mornings per week and as such means a parent is always with each child.
- DO Cape Danny Mosconi visited the site and was satisfied that multiple escape routes were available and fuel loads satisfactory.
- Danny Mosconi and A/CESM Peter Stark visited Steiner School in Yallingup to review their bush fire management plan and school preparedness in the event of a bushfire event.
- As a result, a series of recommendations and additional material has been made available to the Steiner School to allow them to enhance their preparedness. A copy of this materials has been sent to FCO's Peter Dawson and Mark Fisher.
- The principal of the Steiner School has acknowledged the receipt of these recommendations.
- DFES have offered to also take part in their school evacuation exercises when they are scheduled.

10) Many thanks

- I wish to thank all the volunteers and City of Busselton staff for their unending support during the time Tim has been away. At times it has been an intense experience, but has given me skills that I will take back to 'volunteer land'.

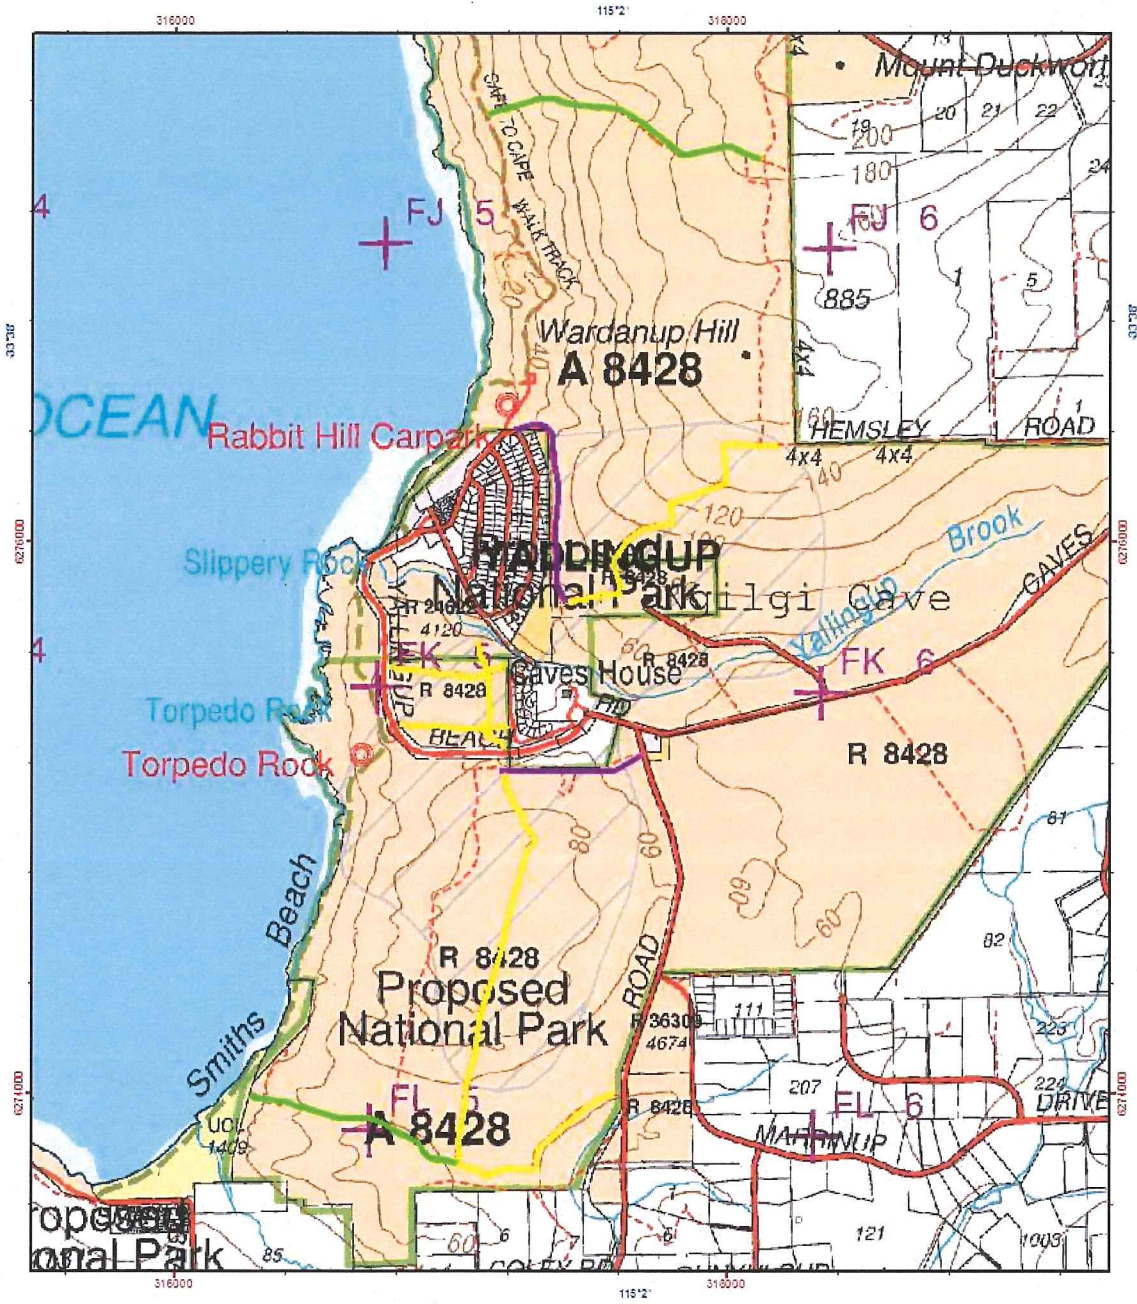

Attachment 3**Attachment 7.3 Report to City of Busselton Bush Fire Advisory Committee meeting to be held on 14 March 2017**

Agency: Department of Parks and Wildlife (Blackwood District)

Officer Representing: Jeremy Friend

Matters to be discussed:

- Blackwood District attended 47 fires (07/03/2017).
- Planning and boundary preparation well underway for Autumn 2017.
 - 10 ha cell east of Yallingup (BWD_076) considered priority for Autumn
 - As at 27/02/2017, Parks and Wildlife have undertaken prescribed burning activities covering approximately 173,000ha within the 3 Forest Regions
- Blackwood District was successful in gaining a grant under the National Bushfire Mitigation Program to undertake additional mechanical fuel management around Yallingup. This will further enhance the areas that are maintained annually around the townsite. We are waiting on final reports from environmental checks. Intent to start the machine work in April/May 2017 (DRAFT alignments highlighted below)

- Additional 10m of parkland clearing
- Vertical prune and horizontal to existing disturbance
- Widen additional 10m
